Rural Development Specialist - Environmental

Coeur d'Alene, Idaho

Skills

- Data Management
- ArcGIS Mapping and field collection
- Technical Assistance and Training
- Needs assessments
- Work plan management
- Income Surveys
- Financial Capacity Analyses (Rate Studies)

Experience

Miles Rinne joined RCAC in 2020. He provides technical assistance and training to rural communities on small water systems asset management and mapping. His responsibilities include utilizing ArcGIS and GPS units to map water systems and effectively communicating with community water systems to establish their needs, working with the utilities to develop effective rates to meet the budgets needs.

Before joining RCAC, Mr. Rinne was a research assistant for Eastern Washington University where he developed relationships, trained, and assisted small water systems in eastern Washington State including tribal communities to create simple asset management plans and maps. He worked to develop a GIS based database containing key features of small water systems with the ability to utilize a mobile app in the field to collect data points.

Education

Master of Urban and Regional Planning - Eastern Washington University, Spokane
Bachelor of Arts, Geography & GIS Certificate - Eastern Washington University, Cheney
