

“Introduction to various approved ammonia test methods”

LIVE ONLINE Workshop

In this 3 hour live online “Introduction to various approved ammonia test methods” training we will explore a variety of analytical methods for ammonia approved for wastewater compliance. We will discuss the sample preparation requirements, analytical procedures, and quality control processes. This class will help you better understand how to determine which test method is best suited for your operation.

In this workshop we will discuss:

- Sample collection requirements
- Analytical procedures approved for NPDES and General Nutrient Permit compliance
- Quality Control requirements for the approved analytical methods
- Evaluate the pros and cons of each method to help you identify which method may be best suited for your operation

During this workshop we will provide you with detailed information on how to perform the analyses and share “tips and tricks” our instructor has learned throughout her years of conducting these analyses.

Date: March 1st, 2022

Time: 12:00 pm to 3:15 pm PT

Where: LIVE ONLINE

Fee: \$100
