

CEU Evaluation Request

3 hours (0.3 CEUs - Water, Wastewater, Onsite Install, and Onsite O&M)

Class: **Jobsite Safety**

Date: Various

Location: Various

Instructors: OAWU Staff

Description: Discuss the overall approach to key elements of a strong health and safety program, reviewing the psychology side of management and employee's responsibilities. Overview of topics for both routine and non-routine tasks associated with risk, and how to practically expand safety programs to mitigate such risks.

8:30 - 10:00 (0.15) Presenting attendees with ideas into the psychology of safety, impact of lessening resources and increasing job requirements

10:00 - 10:15 Break

10:15 – 11:45 (0.15) Review OSHA requirements as they pertain to specific safety topics associated with everyday tasks, i.e. personal protective equipment, hazardous chemicals, extensive weather, importance of routine safety meetings, record-keeping and evaluations.
