

Distance Learning Attendance Tracking

Distance Learning is managed by Clean Water Services through the Absorb Learning Management System. Employees may self-enroll in the courses. A recorded video presentation is viewed by the student. After each section, a quiz becomes available and the student must complete the quiz with a score of 70% minimum before the next section becomes available for viewing. At the successful completion of all view time and passing all the quizzes, the student is marked as completing attendance and a certificate is issued.
